The appliances and electronics & electrical applications, have the largest market and which is expected to grow in near future. This is followed by the automobile sector. The automobile segment is expected to be the growing segment during the forecast period, due to few initiatives taken by government. The construction sector is expected to witness a stable growth rate.

One of the major driver for this market is the growth in the end-user industries such as automotive industry. The increase in disposable income of people will increase their purchasing power thus they will buy more such durable products, which is further driving the ABS resins market. The major challenge faced by this market is the development of sustainable products which can replace ABS resins applications in any areas. The production of ABS resins results in emission of solid waste & waste gases and it is also harmful to human beings, hence the stringent environmental regulations are being made to avoid these, which is a major challenge to this market.

Some of the major players in the market are Mei, Styron, Chemtura Corporation, SABIC, BASF, The Dow Chemical Company and Covestro.
